Dear Prof Ruiz,

AZBIL TELSTAR TECHNOLOGIES, SLU, with address at Av. Font i Sagué, 55 - Parc Científic i Tecnològic Orbital 40, 08227 Terrassa, is the exclusive representative in Spain of the products manufactured by BRUKER FRANCE, SAS, and is the only qualified and competent company for the sale and technical assistance of this equipment in the Spanish territory.

We confirm to you that the supply of the Scanning Tunneling microscope and subject of TELSTAR's offer, is exclusively available at Bruker manufacturing of this equipment.

This instrument is also associated with several patents and exclusive licenses making this model a unique instrument.

In particular, we can note the presence (non-exhaustive list) of unique specifications:

- STM mode in air & liquids capable to reach real atomic resolution imaging
- STM with scan-by-tip design (sample remains stationary)
- STM with possibility to swap between multiple scanners whereby each scanner has a specific XY range, Z range, and current amplifier gain
- STM microscope which can evolve into an EC-STM microscopy (electrochemical STM) with integrated bipotentiostat
- STM microscope that can evolve into a high performance AFM than can reach real atomic resolution

Bruker is the only manufacturer able to supply this equipment and its accessories.
