1 OBJECTIVE

The objective of this document is to define in detail the operations of the transport of the Production Madame Butterfly, from Aberdare to Liceu (Barcelona) and return, to receive a quote from the company Jeppessen Heaton, Ltd.

2 GENERAL CONDITIONS OF THE TRANSPORT

- The transport company must get the compromise to arrive on the date and time agreed at the loading or unloading address.
- The services include 4 hours of loading / unloading at origin or destination. The loading delays will start at the 5th hour.
- The supplier will invoice only the number of operations finally done, considering the unit price of the quote for each operation.
- Liceu consider labour days from Monday to Saturday (both included) and nighttime from 22:00PM to 06:00 AM, both included.
- Liceu will formalize an insurance policy of the production from the moment that is loaded in Aberdare until the unloading in Aberdare, when it returns.

2.1 Other services included in the service

In addition of the operations detailed in this document, the bidder assumes the following services/activities:

- Coordinate the loading/unloading operations with the Logistic department of Liceu.
- Do the manoeuvres needed for parking and unparking the trucks to the Liceu's or El Bruc's docks.
- Be flexible to solve the programming changes or difficulties of the operations that could appear.
- Design a single contact person to coordinate the operations with Liceu. This person would be the one that would links the Liceu with the origin/destination interlocutor to coordinate the operations.

2.2 Environmental documentation

At the end of the operations, the bidder must send the following information of each operation to calculate the CO2 impact of the operation:

- Km covered.
- Fuel consumption average l/100 Km.
- Total fuel consumption for each operation.
- Tons of CO₂ emissions of each operation.

2.3 Unloading / loading addresses

Liceu has two delivery addresses:

- Liceu – La Rambla (the Theater)
Gran teatre del Liceu
La Rambla 51-59
08002 – BCN

Once the trucks enter to the trucks lift platform, the Loading/unloading at Teatre could be at:

- **Liceu (Esc)** → This means that we unload/load at stage Level. The stage level is 2.5 m high from the street level. The lifting of the truck with the elevator is quick and easy. In this case the manoeuvre of loading / unloading is quicker.
 - **Liceu (Box Inf)** → This means that the loading / unloading takes place at the -16m level. In this case the manoeuvre of moving the trucks from the street level to the -16 level is more difficult and takes more time.
-
- **Liceu – Warehouses at El Bruc**

(*) **The dates in blue are estimated** → The bidder must agree those dates with the origin / destination.

The loading dates in black, are very critical. Any delay in those loading dates at the Liceu could create big inconvenient to the rest of the activities of the theatre.

3.2 ATA carnets

The bidder must do the ATA carnets for the whole operations. The first truck to arrive (operation 1) will be the same of the last one (operation 8).
