

## TECHNICAL REQUIREMENTS CHECK AND VERIFICATION REPORT

This document is the report of the verification and verification of the technical requirements of the offers presented in the Procedure for the **inclusion of charging points managed by BSM in the networks of electromobility operators.**

**FILE NUMBER: 2024EM0040AC**

July 2024

Check report and verification of the technical requirements of the offers presented in the Procedure for the inclusion of charging points managed by BSM in the networks of electromobility operators.

## 1 Collaboration agreement

### 1.1 Characteristics of the procedure

#### A.- DESCRIPTION OF THE OBJECT OF THE CONTRACT:

The object of the contract consists in the inclusion of the charging points that are part of Barcelona's own network of Municipal Services in the networks of all those electromobility operators that offer various solutions in this area through applications.

This procedure will allow the interested parties to operate with the aim of allowing their users to recharge the batteries of their electric vehicles in the network of charging points managed by B:SM.

#### B.- ESTIMATED VALUE OF THE CONTRACT: 75,000 EUROS (excluding VAT)

concept	Amount (excluding VAT)
Base budget	15,000 euros
Possible extensions	60,000 euros
<b>Total</b>	<b>75,000 euros</b>

#### B.1.- BASIC CONTRACT BUDGET: 15,000 EUROS (VAT included).

The tender budget, as well as the estimated value, consists of an indicative approximation based on the volume of operations that BSM estimates that the operators that integrate can generate.

The operator will not be obliged to pay this amount in full, which will in any case be what corresponds to the number of operations actually carried out.

#### D.- DURATION OF THE CONTRACT: The duration of the contract is set at ONE (1) YEAR from its formalization

#### E.- PLACE OF EXECUTION: Barcelona.

#### F.- LOTS: No.

#### G.- GUARANTEE TERM: Does not apply.

#### H.- ADMISSION OF VARIANTS AND IMPROVEMENTS: Not applicable.

### 1.2 Presented companies:
