The bidding companies must also demonstrate that, throughout the duration of the performance of the contract, they will effectively have the necessary resources by submitting the written commitment to that effect from the aforementioned entities.

However, with respect to the criteria relating to academic and professional degrees and professional experience, companies can only use the capacities of other entities if those entities provide the services for which the aforementioned capacities are necessary.

Under the same conditions, Temporary Joint Ventures may use the capacities of the participants in the venture or of other entities.

8.2. The communications and notifications that are made during the procurement procedure and during the validity of the contract will be made by electronic means through the notification system **e-NOTUM**, in accordance with the LCSP, Act 39/2015, of 1 October, on the common administrative procedure of public administrations and Order PDA/21/2019, of 14 February, which determines the system of electronic

notifications of the Administration of the Generalitat de Catalunya (Government of Catalonia) and its public sector. For these purposes, notices of the availability of notifications and communications will be sent to the email addresses and mobile phones that the companies have provided for this purpose in the ESPD or responsible statements.

The time frames to be counted from notification will be calculated from the date of sending the notification notice, if the decision subject to notification has been published on the same day in the contractor profile of the contracting body.

8.3. Therefore, this is the minimum required security level of the electronic signature certificate accepted for signing the ESPD and the bid

Regarding foreign certificates from the European Union, qualified certificates will be accepted in any country of the European Union in accordance with Article 25.3 of the aforementioned Regulation (EU) 910/2014/EU on electronic identification and trust services, which provides that 'a qualified electronic signature based on a qualified certificate issued in a Member State will be recognised as a qualified electronic signature in the rest of the Member States'.

NINTH.- SUBMISSION OF BIDS

9.1. Companies can submit their bids solely and exclusively by online means on the Public Procurement Platform of the Generalitat de Catalunya (Government of Catalonia) from the CCMA, S.A. contractor profile.

Bids can be submitted until the time **1:00:59 p.m. on 11 April 2025**, so bids received later (i.e. 1:01:00 p.m. onwards) will be considered as arriving after the deadline.

Thus, it is the obligation of the contractor companies to submit the documents to antivirus screening and, in the event that documents from their bids arrive with viruses, it will be their responsibility to ensure that the Administration cannot access their content.

In the event that any document submitted by the bidding companies is damaged, blank or illegible or is affected by a computer virus, the Contract Awarding Committee will assess, depending on the affected documentation, the legal consequences regarding the participation of this company in the procedure, which shall arise from the impossibility of accessing the content of one or more of the documents in the bid. If these are documents that are essential to understand or evaluate the bid, the board may grant the exclusion of the company.

The bidding companies may submit a backup copy of the submitted electronic documents via electronic physical support, which will be requested from the bidding companies should the need arise. The backup copy will serve to allow access to the content of the documents in case they are damaged. In this sense, it is necessary to recall the importance of not manipulating these files in order not to change their electronic fingerprint, which is what will be checked to ensure that the documents in the backup copy, sent in physical electronic media, match those documents sent in the bid, through the Sobre digital (Digital Envelope) tool. Likewise, it should be borne in mind that this copy cannot be used in the event that documents with viruses have been sent through the Digital Envelope tool, given the technical impossibility in these cases of being able to compare the electronic fingerprints and, therefore, to be able to guarantee the non-modification of the bids once the submission period has ended.

9.6. Each bidding company may not submit more than one proposal . Nor may it sign any proposal in a joint venture with others if it has done so individually or be part of more than one temporary union. Violation of these rules will result in the non-admission of any of the proposals it has signed.

In this case, the Procurement Board will request from the affected company a report justifying the viability of its offer, which must be delivered within a maximum period of five working days from the notification. In view of this report and that prepared by the technical services of the CCMA, SA, the Procurement Board may declare the offer abnormally low and, therefore, exclude it from the classification.

Requests for justification will be made through the functionality provided for this purpose by the Digital Envelope tool, through which an email will be sent to the address or addresses indicated by the bidding companies in the registration form, with the link for them to access the space of the tool in which they must provide the corresponding documentation.

This requirement will be communicated to the company by electronic communication through e-NOTUM, integrated with the Public Procurement Services Platform.

In both cases, the bidding companies will be compensated for the expenses they have incurred and that are duly justified.
