Library Users: any person who is not a member of the authorized users mentioned above and who holds a current, valid library card from the client as well as walk-in-users.				

Appendix 2 - Terms of Open Access Publication

1. Definitions

“Eligible Authors” means authors who are affiliated with a Licensee, i.e. who are students enrolled at or accredited to Licensee or who are teaching and research staff employed by or otherwise accredited to the Licensee including university staff, whereby in case of articles published by multiple authors only the corresponding author may qualify as an Eligible Author.

“Eligible Articles” means materials eligible for open access publication within the framework of this Agreement. Eligible Articles shall be submitted by Eligible Authors.

“Open Access License” means the Creative Commons license Attribution 4.0 International (CC-By 4.0) used for the publishing of Eligible Articles. The Creative Commons CC0 license will be assigned to the data accompanying the Eligible Articles.

“Rightslink” means the system hosted by the Copyright Clearance Center which De Gruyter uses for the identification and administration of the open access publication. For the avoidance of doubt, De Gruyter always remains primarily responsible towards Licensee for any and all obligations set forth in this Agreement. Copyright Clearance Center’s failure in identifying and/or administering the open access publication will not relieve De Gruyter of its obligations.

2. Identification of Eligible Authors

2.1 De Gruyter will enable the open access publication of Eligible Articles through Rightslink. Eligible Authors shall be identified through at least one of the following parameters: their e-mail domain; persistent identifier, such as Ringgold, ORCID or other recognized identifier.

2.2 Under Rightslink, Eligible Authors shall not be offered the option to publish their Eligible Article under any license other than the Open Access License. Nothing in this Agreement shall be taken to restrict, limit or curtail any provisions of the Open Access License.

2.3 De Gruyter will strive to clearly indicate the availability of an institutional funding agreement to Eligible Authors both within the submission process and on its website. It will make clear that Eligible Authors do not need to pay article processing charges for publishing articles open access.

2.4 If De Gruyter fails to identify authors as Eligible Authors and then publishes their article under a subscription model, De Gruyter shall be responsible to convert the article promptly at no additional cost so that it is published pursuant to the Open Access License.

2.5 If De Gruyter fails to identify authors as Eligible Authors and then charges them with article processing charges for publication of their article (or charge them without discount in the case of a fully open access eJournal), De Gruyter shall refund such paid APC (or an amount corresponding to the discount in the case of a fully open access eJournal) to the author within 30 days.

3. Verification of Articles

3.1 Once an Eligible Author’s article has been accepted for publication, De Gruyter shall notify the Licensee by email for verification. The notification will contain all necessary metadata including, but not limited to, name and email address of the author, full name of author’s affiliation (e.g. university, institute, department) and other affiliations if there are more than one, submission date, journal title, manuscript ID (if applicable), article title, article type, license type, amount of article processing charges.

3.2 The date that will determine if an article is eligible to the publication terms of this Agreement will be the date on which the article has been accepted for publication by De Gruyter.

4. Article Publication

4.1 Eligible Articles are published online and in the first instance under the Open Access License, with Eligible Authors retaining their copyrights. Eligible Authors only grant De Gruyter the non-exclusive right to publish Eligible Articles under the terms and conditions of the Open Access Licence.

4.2 Affiliation of the Eligible Authors must be stated in the version of record of the articles.

4.3 Upon publication, De Gruyter will use reasonable efforts to provide the Eligible Author by email with a PDF copy of the version of record of the Eligible Article, the article's DOI, the funder name, and a human-readable summary of the Open Access License terms with encouragements to share the article in compliance to it, for example via social medias, blogs and repositories.

4.4. De Gruyter will also submit the article and its metadata to all relevant third-party repositories.

4.5 De Gruyter guarantees that all published Eligible Articles will be available to anyone on its website at all times, including beyond the Term, and on a twenty-four-hour basis, save for routine maintenance (which shall be notified in advance wherever possible). De Gruyter will restore access as soon as possible in the event of an interruption or suspension of the service. In case of prolonged and/or repeated interruption or suspension, the Licensee shall be entitled to claim fair damages and/or compensation from De Gruyter.

4.6 No additional service fees (e.g. colour-in-print, reprints, posters) will be charged under this Agreement. Any additional service fees will be at the discretion of, and for payment by the Eligible Authors.

4.7 APC per article: EUR 2,300

4.8 The author may opt in or opt out to publish under this agreement.

5. Metadata and Industry Standards

5.1 When provided by the Eligible Author, De Gruyter undertakes to use ORCID (<http://orcid.org/>) throughout the workflow from submission to publication, expose Eligible Authors' ORCID ID in Eligible Articles and distribute it to Abstracting & Indexing (A&I) services, CrossRef and other discovery services.

5.2 Upon publication of an Eligible Article, De Gruyter will register as much metadata as possible on CrossRef, including, but not limited to: (1) the Eligible Article's digital object identifier (DOI), (2) the funding metadata, including funder name and grant number, in the metadata in Funder Registry (on CrossRef), (3) bibliographic citations, (4) funder of the open access publication and (5) the Open Access License.

5.3 De Gruyter is responsible for updated and clear information at the DOAJ and SHERPA/RoMEO websites.

5.4 De Gruyter will comply with the last version of NISO's Recommended Practice on Access and Licensing Indicators (<https://www.niso.org/standards-committees/access-and-license-indicators>), including, but not limited to, guidance regarding free_to_read and license reference metadata fields and regarding mechanisms for distributing metadata.

5.5 De Gruyter will provide aggregated usage statistics to the Licensee which are compliant with COUNTER Codes of Practice or confirm to the then-prevailing industry standard concerning the use of the licensed electronic products by the Authorised Users, consistent with applicable privacy laws and confidentiality requirements. The Licensor will provide to link resolver and A-Z list vendors every six

months with the following information about each title in the Licensed Material: Title, ISSN or eISSN, previous title(s) if appropriate, previous ISSN or eISSN if appropriate, first volume and issue made available as part of the Offer, or (if volume/issue is not available) URL. Licensor will provide link resolver vendors with the algorithm or syntax for constructing an article-level link from an article's metadata within the Licensed Material.

6. Editorial Independence

6.1 The parties acknowledges that while the Licensee has financial obligations towards De Gruyter, the Licensee is in no way involved with the editorial process. Nothing herein contained shall oblige De Gruyter to publish any article submitted to De Gruyter by an Eligible Author. Licensee acknowledges that the selection of material to be published by De Gruyter is entirely at the discretion of De Gruyter's editorial policy.

7. Reporting

7.1 De Gruyter will provide quarterly report to include all articles from authors affiliated with the Licensee published in eJournals. The reports shall include the following details:

- Name and email address of the author
- Author's affiliation
- Date of acceptance
- Online publication date
- Journal Title
- Article title
- Article type
- DOI and a link to the published article
- CC license type
- Funding organisation (research funder)
- APC cost and date of payment (when applicable)

7.2 De Gruyter will report annually how many eJournals have flipped during the year from/to a subscription model to/from an open access model, including hybrid model.

8. Workflow enhancement

The parties agree to collaborate to enhance the workflow from submission to publication described herein, as well as invoicing and reporting processes. Any workflow revisions shall tend to meet all relevant parts of the "ESAC Workflow Recommendations for Transformative Agreements" available at <https://esac-initiative.org/about/oa-workflows/>

Appendix 3 – Terms and Conditions

- Read access to all De Gruyter ejournal articles going back to as far as 1995
- Perpetual access rights to content of subscribed years
- Read access to all De Gruyter ejournal articles prior to 1995, going back to 1826
- Unlimited publishing across all eligible De Gruyter ejournals, including hybrid, S2O and Gold OA (GOA) ejournals.
- Annual increase: 3%
- Duration of agreement: 3 years
- If a journal reverts from S2O to Hybrid, Read and OA Publish benefits will continue
- All rights extended to new launch & transfer titles, excluding major acquisitions
- Commons Attribution (CC BY) license by default. Some exceptions apply
- Workflow and handling of Hybrid and Gold APC OA = Agreement Manager CCC Rightslink
- If eligible article "missed" and published behind, it will be retrospectively published OA
- Agreement based on acceptance date of article
- Pricing for GOA in years 2+ to be re-negotiated if performance exceeds 120% of the noted GOA fee
